EXPLANATORY NOTES

1. New or recent changes in presentation

A computer has been used for the first time in the production of these statistics. Most of the tabulations in this volume have been reproduced, by photo-lithographic processes, from the output of the computer system. The size of the pages has been altered from royal octavo to demy quarto and some tables have been re-arranged either to meet the needs of the new system or to make better use of the available space. Alterations in layout and presentation have been kept to a minimum.

(a) *Changes introduced this year*

Appendix A presents a serial analysis of fertility by year of marriage and marriage duration. This has formerly been published in Appendix A of Part III of the Statistical Review.

Table A1. Figures for Great Britain and Ireland have been replaced by figures for the United Kingdom. The population of the Irish Republic is still shown.

Tables A1, A2, A3 and **A4.** Figures are now shown to hundreds instead of to thousands.

Table A5 now gives population projections for individual years up to 1970 as well as those for decennial intervals.

The former **Table B** is now sub-divided and appears as:-

Table B 1: Marriages and Live Births, 1841-1963.

Table B 2: Stillbirths, 1927-1963.

The table hitherto described as a **Supplement** to **Table P1** is to be published annually starting this year, as part (b) of that table.

The former **Table P6(a)** is now **Table P6,** and **Table P6(b)** is now **Table P7.**

Table S has been extended to include the following additional sections:

(i) Occupations of intending long-term migrants travelling by sea and air routes to and from the United Kingdom; (ii) the migration into and out of the total population of England and Wales, by sex, age, and marital condition; and (iii) the movement of intending long-term migrants by long sea and other routes between the United Kingdom and countries overseas (excluding the Irish Republic).

In **Table V** an extra column has been inserted showing the number of councillors on each council.

Deaths, as well as marriages and live births, are now shown in **Table W(b).**

Hospital Regions have been introduced into **Tables A4** and **E.** (For the constitution of Hospital Regions in terms of administrative areas see explanatory note 18).

(b) *Changes introduced in 1962*

From 1962 onwards the estimated pre-marital births have been based on the assumption that 8 months interval between marriage and birth is a more reasonable limit than 9 months.

The tables previously described as **Supplements** to **Tables P3** and **P6** are now to be published annually as part (b) of **Table P3** and as **Table P7** (**Table P6(b)** for 1962) respectively.

Table GG - the female birth proportions and the illegitimate stillbirth rates have been excluded; also (from 1963) the estimated female populations.

(c) *Changes introduced in 1961*

In **Tables A3** and **H**, the divorced, previously included with the widowed, are now shown separately.

Table F shows the numbers of marriages in conurbations and remainders of regions.

Table G is published with the "age not stated" cases distributed among adult ages throughout.

Table AA shows paternities and births by age of father.

The maternity section and the sex analysis are omitted from **Table BB** and the table now shows remainders of regions.

Tables HH, II, KK and **MM** now relate to legitimate live births instead of legitimate maternities.

The following tables or parts of tables have been suspended since 1961:

Table LL showing first legitimate maternities by mother's age and marriage duration.

Table QQ showing legitimate maternities to women married once only in respect of which the mother's age, the year of her marriage or the number of her previous liveborn children were not stated.

Table RR showing infertility of deceased married women by certain causes of death.

The sections of **Table TT** relating to age of mother.

2. Supplements to Tables

It is intended that the following supplements will be published at intervals of several years:

Supplement to Table AA.- Legitimate births by ages of parents in combination.

Supplement to Table FF.- Legitimate stillbirths per 1,000 illegitimate births by age of parents in combination.

Supplements to Table HH

1. Legitimate live births to remarried women by age of mother at birth and the number of her previous liveborn children by all husbands.

2. Legitimate births by sex, to all married women, by age of mother at birth and the number of her previous liveborn children.

3. Legitimate male births per 1,000 legitimate female births, to all married women, by age of mother at birth and the number of her previous liveborn children.

Supplements to Table II

1. Legitimate live births to remarried women, by age of mother at birth and duration of current marriage.

2. Legitimate live births to all married women, by age of mother at birth and marriage duration.

Supplement to Table MM.- Legitimate live births to remarried women, by duration of current marriage (in completed years and months), age of mother at marriage and calendar year of marriage.

Supplements to **AA, FF, HH** and **II** were last published in 1961 and the **Supplement** to **MM** in 1962.

3. Populations

The estimates of population appearing in this volume and described as "home", "total" or "civilian" have the following content:

Home population - the population, of all types, actually in England and Wales, distributed by area according to residence.

Total population - the home population *plus* members of H.M. Forces belonging to England and Wales and serving overseas but *minus* the Forces of other countries temporarily in England and Wales.

Civilian population - the total population *minus* members of H.M. Forces belonging to England and Wales at home or overseas.

The national estimates by sex and age for 1961 and 1962, published in **Table A2** for each of those years, have now been finally revised according to an age-graduation of the 1961 Census results. These revised figures, and similarly-based estimates for 1963, are presented in **Appendices C and D** and **Table A2** (respectively) of this volume. The method of graduating was to divide the population enumerated at each single year of age by the number of births in the relevant past period and to draw a smooth curve through the resulting "survivorship factors", allowing for the effects on the curve of migration and the temporary absence abroad of non-civilians. Multiplying the smoothed survivorship factors by the related births provides the graduated population of that age.

The estimates in **Tables A3** and **A4** have not yet been similarly revised.

4. Births and birth rates

The births recorded and analysed for England and Wales for periods from 1939 onwards are those which *occurred* during the period. The numbers *registered* in 1963 are shown in the footnote to **Table B 1** .

For classification by area (**Tables E, BB, etc.**) births and maternities are assigned to the area of the mother's usual residence if this is within England or Wales; if not, to the area of occurrence.

The national birth rates shown in **Tables C** and **D** are calculated by relating birth occurrences to the total population (before 1939, birth registrations to the home population; in 1914-19, birth registrations to the total population). The rates in **Table E** are calculated from birth occurrences and home populations (see Note 3 above).

5. Deaths and death rates

The deaths recorded (**Tables E** and **SS**) are the total *registered* (including non-civilians) in the calendar period, the time lag between the date of occurrence and the date of registration being usually only a day or two. In general, deaths have been assigned to the area of usual residence of the deceased; if this is not within England or Wales they are assigned to the area of occurrence. Accommodation provided under Parts III and IV of the National Assistance Act, 1948 is regarded as the place of residence of persons dying there Before 1st January 1958 chronic sick and psychiatric hospitals were similarly treated for this purpose but from that date the method of classification was modified, the main change being that a death in such a hospital is now assigned to the area of occurrence only if the deceased had been there six months or more. If the deceased had been there less than six months the death is transferred to the area of previous usual residence.

In some small areas the numbers of deaths may also have been appreciably affected by the *opening, closing or change of use* of certain institutions, so that figures may not be comparable with those of earlier years.

The crude death rates in **Table E** are calculated from total deaths and home populations.

6. Area comparability factors

(a) Births

The crude birth rates for local areas in **Table E** (col. 8) may not be comparable one with another because the populations on which they are based may contain different

proportions of women of child-bearing ages. In order to eliminate differences between local birth rates due to this cause a standardising factor, termed an Area Comparability Factor is calculated (as described on page 30 of the 1954 *Statistical Review, Part III, Commentary**).

The product of the crude birth rate and this Area Comparability Factor (col. 9 of **Table E**) is a rate which makes allowance for this influence. The ratio of this adjusted rate to the rate for England and Wales as a whole is shown in col. 10 of **Table E.**

(b) *Deaths*

The crude death rates for local areas in **Table E** (col. 14) may not be comparable one with another. In the first place, the populations on which they are based may have widely differing structures by sex and age. In order to eliminate differences between local death rates due to this cause a standardising factor, termed an Area Comparability Factor, is calculated (as described on page 57 of the 1954 *Statistical Review, Part III, Commentary**).

In the second place the populations on which the crude death rates are based may include a disproportionate number of invalids if there are certain types of hospitals in the area. In order to eliminate this difference the Area Comparability Factors are adjusted so that they have the effect of apportioning the deaths and the populations in chronic sick and psychiatric hospitals over all areas of the country according to their non-institutional populations. The product of the crude death rate and this Area Comparability Factor (col. 15 in **Table E**) is a rate which makes allowance for these two influences. The ratio of this adjusted rate to the rate for England and Wales as a whole is shown in col. 16 of **Table E.**

7. Fertility analyses

All the tables that appear in the **Fertility Analyses** are based upon occurrences with the exception of **Table SS** which is based upon registrations.

One of the changes introduced by part of the Population (Statistics) Act, 1960, which came into operation on 1st January 1961, was that the age of the child's father was required where his name was entered in the register, i.e. where the entry was that of a legitimate birth or of an illegitimate birth registered on the joint information of the parents. The analysis of illegitimate births by father's age in **Table AA(b)**, being thus restricted to those births registered jointly by the parents where the father's age was stated, is therefore incomplete and may be misrepresentative.

The term "maternity" in these tables is used to denote a pregnancy which has terminated in the birth of one or more live or still born children, and the term "paternity" a legitimate pregnancy of the man's wife which has terminated in the birth of one or more live or still born children. The maternity record differs from the birth record in that multiple births from a single pregnancy are counted as one maternity, while for the birth record each child born is reckoned as a separate unit. The definition of a stillborn child is given in Section 41 of the Births and Deaths Registration Act, 1953, as follows: "a child which has issued forth from its mother after the twenty eighth week of pregnancy and which did not at any time after being completely expelled from the mother breathe or show any other signs of life".

The treatment of "not stated" cases is explained in note 12

8. Divorces

The figures in **Table O** have been obtained from the Lord Chancellor's Department. **Tables P 1** to **P 7** have been compiled from the records of the Divorce Registry, controlled to the total given by **Table O.**

9. Register of electors

Table U, compiled from returns received from Electoral Registration Officers, shows the

---

* Obtainable from Her Majesty's Stationery Office, price 8s. 0d. net.

numbers of parliamentary electors on the February 1963 Register for each parliamentary constituency as constituted at the date of the general election held on 8th October 1959. The numbers of votes cast at by-elections held on the February 1963 Register have been supplied by the Home Office. The 1961 acreages, which comprise land and inland water, fo each parliamentary constituency, have been obtained from the Ordnance Survey Department.

The numbers of votes cast at by-elections held during the first six weeks of the calend year are shown in footnotes to **Table U** in the preceding year's volume.

Table V, which shows the number of local government electors, the total number of councillors on each council, and an analysis of local elections held in 1963, is compiled from returns received from clerks to local councils.

10. Migration

Table S now shows various data on balance of civilian passenger movement and migration.

Part (a), which shows the balance of permanent migration, is also included in the passenger movement balance in part (e), and relates to travel by the long sea routes only Up to and including 1960 this was prepared by the Board of Trade and from 1961 by the General Register Office from returns received under the Merchant Shipping (Passenger Returns) Regulations, 1960. These expired on 31st December 1963.

Part (b) shows the occupations of intending long term migrants travelling by sea and ai routes to and from the United Kingdom.

Part (c) shows the migration into and out of the total population of England and Wales by sex, age and marital condition.

Part (d) shows the intercensal population balance by migration for England and Wales. This is obtained by deducting the excess of births over deaths (the natural increase) fro the intercensal increase in population. Net gains by migration are shown by a *plus* sign and net losses by a *minus* sign.

Part (e) shows the balance of civilian passenger movement and relates, with certain shown exceptions, to travel by all routes to and from the United Kingdom. This has been prepared by the Board of Trade.

Part (f) shows the movement of intending long-term migrants by long sea and other route between the United Kingdom and countries overseas (excluding the Irish Republic).

Parts (b), (c) and (f) have been introduced this year. Parts (b) and (f) have been compiled from the International Passenger Survey carried out by the Central Office of Information (Social Survey Division), so far as traffic by air and by the short sea route is concerned. For 1963 only the long sea routes were covered by the statutory returns referred to above.

In parts (a) and (e) the United Kingdom includes the Irish Republic prior to 1st April 1923. Inward balances are shown by a *plus* sign and outward balances by a *minus* sign.

The terms "permanent migration" and "long sea routes" have the following meaning:

Permanent migration - a declared intention by the passenger to reside for more than a year in the country of destination.

Long sea routes - all routes other than those to or from ports in Europe and the Mediterranean and Black Seas.

Prior to 1961, "long sea routes" were defined as all routes other than those to or from ports in Europe, the Mediterranean islands, all ports in Turkey and ports in Russia other than those on the Pacific coast.

11. International tables

Information for the completion of **Tables W, X, Y** and **Z** has been obtained from United Nations publications and from official sources.

12. "Not stated" cases

Computer processing has permitted the use of new methods of dealing with cases where particular items of information are not known or not stated at registration. Hitherto such cases have been rateably distributed over certain tables. Now the computer assigns a specific value to any "not stated" item in the record which is made use of in such tables. More specifically:

Births

Births for which the age of mother, age of father, year of marriage or the number of previous children was not stated have been assigned the value of the appropriate item from the last case with similar characteristics to be processed. Notes of the number of cases dealt with in this way have been included in the relevant tables.

Marriages

Marriages with the age of one of the parties not stated have been assigned a value for that age based upon the other party's stated age, adjusted according to the combined marital condition of the parties. Where the ages of both parties were not stated, the values assigned have been those appearing on the last of a sub-sample of previous cases with the same combined marital condition.

Divorces

Not stated age at marriage has been assigned a value in a manner similar to marriages. Present age is estimated from age at marriage.

13. Changes in boundaries

Areas which have undergone a change in boundary during the year are identified in **Table E** by an asterisk *, newly created areas by the sign †, and abolished areas by the sign ‡. For any such area the statistics shown for the current year represent the events assigned to the area within the boundaries as they existed at the date of the event, and the population given in **Table E** (col. 2), which is used for the calculation of crude birth and death rates, is a weighted average of the mid-year populations of the area as constituted before and after the change. This population figure may therefore differ from any given in **Table A4** for the same region, conurbation, etc., which relates to the area as constituted at mid-year. Details of boundary changes are given in **Appendix B.**

14. Indication of reliability

Rates given as 0 indicate that the actual rate is less than half of a unit. A dash (-) in any cell indicates that there were no events. Where a cell has been left blank no denominator is available. Rates calculated from less than 20 events are distinguished by italic type as a warning to the user that the smallness of the experience may affect their reliability as a measure.

Numbers

If d represents the deaths in an area and p the population in that area then, if d/p is small, the standard error (s.e.) of d is approximately $\sqrt{d}$ assuming that the deaths are independent of one another. Clearly, the larger the number of deaths the smaller will be the proportionate variability. A deviation either way of twice the s.e. may be expected about once in 20 times. Using this criterion one might expect towns each averaging 20 deaths per year to yield in the same year numbers ranging between 11 and 29 without such differences having any statistical significance. Alternatively it could be said that if 20 deaths were recorded for a town, this number would have a 95 per cent confidence interval of approximately ± 9, there being a 95 per cent chance that the underlying mortality is represented by a number of deaths within this interval.

If d is thought to be an extreme variation it would be more reliable to use as the standard error not $\sqrt{d}$ but $\sqrt{d'}$ where d' is the number of deaths expected if some standard rate (e.g. the national rate) were applied.

Rates

The appropriate standard error of a death rate when d represents the number of deaths and p the population is

$$\frac{\sqrt{d}}{p} \text{ or } \frac{m}{\sqrt{d}}$$

where m is the death rate. The difference between two local death rates m_1 and m_2 can be regarded as significant only if it amounts to more than twice the standard error of the difference, viz.

$$2\sqrt{\left(\frac{m_1^2}{d_1} + \frac{m_2^2}{d_2}\right)}$$

Comparison of adjusted rates

Before comparisons are made, other known sources of variation (such as differences in the sex and age composition of the population) must be removed. If C is the local death Area Comparability Factor, then mC is to be compared with m', the national death rate. The s.e. of mC is

$$C\sqrt{\left(\frac{m}{p}\right)}$$

and

$$mC \pm 2C\sqrt{\left(\frac{m}{p}\right)}$$

is to be compared with m'. As already indicated, m' can be used instead of m in the calculation of the s.e. ; m' has the advantage of itself having only a small sampling error.

15. Abbreviations

A.C. - administrative county (the administrative county of London consists of the City of London (including the Inner and Middle Temple) and the metropolitan boroughs).

C.B. - county borough.

M.B. - municipal borough.

Met. B. - metropolitan borough.

U.D. - urban district.

R.D. - rural district.

16. Standard Regions

The constitution of the standard regions of England and Wales used in this volume (with the exception of **Tables F** and **M** where the whole of Dorset has been included in the South Western Region) is as follows:

19. Urban and rural aggregates

These aggregates comprise (a) the six conurbations combined, (b) the aggregates of urban local authority areas outside the conurbations in three groups according to the size of their resident population at the 1961 Census and (c) the aggregate of rural local authority areas outside the conurbations. Urban areas include boroughs and urban districts as defined by the Local Government Acts, and rural districts are also defined by those Acts.

TABLE A5. Total population, projections from 30th June 1963 by sex and age — England and Wales

These projections have been prepared by the Government Actuary's Department in consultation with the General Register Office

Basis: Mid-1963 estimate of Total population of England and Wales (plus members of H.M. Forces belonging to England and Wales and serving overseas but minus the forces of other countries temporarily in England and Wales).

Assumptions (1963 Revision):

Mortality: Death rates at the outset based on recent experience. At ages under 40, death rates are assumed to decline steadily over the period of the projection until, at the end of the forty years they are one half or less of the rates now being experienced. At ages over 40 the assumed rates of decline become progressively smaller as the age advances until they vanish at ages over 90.

Natality: The estimates assume 863,000 live births in the year mid-1963 to mid-1964 and a gradual increase thereafter to 886,000 in 1970 to 925,000 in 1980, to 1,065,000 in 1990 and to 1,147,000 in 2,000. (Male/Female ratio 1·06 throughout.)

Migration: A net inward migration from other parts of the United Kingdom and all countries overseas of 60,000 in the year mid-1963 to mid-1964, declining to 50,000 a year from mid-1968 onwards. This net inward migration is assumed to comprise equal numbers of males and females.

Projections involving children yet unborn are shown above the dotted line

TABLE E. Home population, live births, stillbirths and deaths, 1963

England and Wales, standard regions, Wales, conurbations, hospital regions, counties, boroughs, urban and rural districts

Note. The perinatal mortality rate is the number of deaths under one week plus stillbirths per 1,000 total live and still births.

See explanatory notes. For explanatory of symbols *, †, ‡ used in this table see note 13.

TABLE M. Persons marrying in 1963, ages and conditions — England and Wales, standard regions, Wales and conurbations

Note. Figures for conurbations, remainders of regions and some standard regions are approximate, relating to groups of registration districts most nearly corresponding to the areas defined in the explanatory notes. The mid-1963 home populations of these groups differed from those of the defined areas by the following percentages:

Tyneside Conurbation	+6·17	Merseyside Conurbation	-0·21	London and South Eastern Region	+2·70
Remainder of Northern Region	-2·16	Remainder of North Western Region	-0·76	Greater London Conurbation	-0·21
West Yorkshire Conurbation	+4·48	West Midlands Conurbation	+2·55	Remainder of South Eastern Region	+0·56
Remainder of East and West Ridings	-3·08	Remainder of Midland Region	-2·44	Southern Region	-3·15
South East Lancashire Conurbation	+1·00	Eastern Region	-7·76	South Western Region	+2·68

Note: The deaths included in this table, as in all tables of the *Statistical Review*, are those which occurred in England and Wales. The numbers which occur outside England and Wales are not generally large enough to be of much significance except for certain years, e.g. for the periods 1914-18 and 1939-47 deaths of non-civilians and merchant seamen which occurred outside England and Wales are estimated at 577,000 and 240,000 respectively.

[1] Passengers who state their intention to settle for at least a year.
[2] Excluding routes between United Kingdom and Irish Republic.
[3] Selected from interviewer's list by migrant.
[4] All sample figures are subject to a calculable risk of error.
From 1964 the sample could involve 280,000 interviews a year with inward passengers and the deliberately larger outward sample some 500,000 interviews. With such samples there would only be 1 chance in 20 that the grossed-up figures would not relate to a true figure within the range in brackets:-

250,000 (245,000-255,000 inwards, 247,000-253,000 outwards);
2,500 (2,000-3,000 inwards, 2,200-2,800 outwards);
750 (475-1,025 inwards, 550-950 outwards);
150 (25-275 inwards, 60-240 outwards);
75 (3-150 inwards, 15-125 outwards).

[5] Farmers, foresters, fishermen, miners and quarrymen.
[6] Gas, coke, chemicals, glass, ceramics, furnace, forge, foundry and rolling mill workers.
[7] Electrical, electronic, engineering and allied trades workers.
[8] Woodworkers, leather, textile and clothing workers.
[9] Food, drink, tobacco, paper, printing, and other products.
[10] Construction workers, painters and decorators.
[11] Clerical and sales workers, warehousemen, storekeepers and packers, service, sport and recreation workers.
[12] Administrators, (senior Government Officials) managers.
[13] Professional engineers e.g. civil, mechanical, electrical etc.
[14] Mining engineers and mining surveyors.

[1]Estimated movement whose balance accounts for population change not due to births, deaths or the deployment of Armed Forces. Figures for movement to and from Scotland and Northern Ireland based on National Health Service data. Net gain from Irish Republic based on intake into national insurance interpreted by evidence of net intercensal effect of this from United Kingdom, 1951 and 1961 Censuses and Republic of Ireland Censuses 1951, 1956 and 1961. A variety of other sources (home and other) including data on the working of the Commonwealth Immigrants Act and the Central Office of Information International Passenger Survey and (for 1963) the sea cards count are the basis for other total figures. The two last sources are especially valuable for outward movement. As neither aliens nor Commonwealth citizens need long term permits or intentions in order to be still here a year later, there is a short fall on actual (as opposed to intending) immigrants. On sex and some age distribution, certain of the above sources provide a partial guide as control for parts of the distribution. Otherwise the Central Office of Information International Passenger Survey is the sole control, especially on the outward side.

[2]Includes Irish Republic.

[2] These figures relate to passengers to and from ports in the Irish Republic and ports in the United Kingdom. From 1961 day trips between the Isle of Man and the Irish Republic are excluded.
[3] From 1956 includes passenger movement to and from Southend and Ferryfield Airports. From 1961 excludes passenger movement to and from the Channel Islands and all day trips. [4] Excluding air passengers prior to 1949. [5] Approximate figures only. [6] Excluding air passengers.
[7] This figure includes air movement which cannot be allocated to specific areas. [8] Excluding South African aliens from June 1, 1962.

[1] Neither aliens nor those Commonwealth citizens whose entry is subject to statutory control need to have made up their mind at entry as a condition of taking up permanent residence in the United Kingdom. With net gain from the Irish Republic some 28,000, it is estimated that the balance of migration in 1963 between the United Kingdom and all other countries was a net inward movement of 10,000 persons.

†Provisional Adoption Orders, which were introduced on 1st April 1959 (see Adoption Act, 1958, section 53) are included in the total. These Orders confer authority on a person not domiciled in Great Britain to take a child out of this country for adoption.

*The number of adopted children usually exceeds the number of adoption orders because the High Court does not issue a separate order for each child where an adopter adopts more than one child at the same time.

TABLE U. Parliamentary electors on the February 1963 Register, with numbers of votes cast at by-elections held thereon (shown in footnotes)

England and Wales, county and borough constituencies

Note. (1) The Register of electors 1963 was prepared in respect of the qualifying date 10th October 1962, and came into force on 16th February 1963. The figures are for constituencies as constituted at the date of the General Election held on 8th October 1959. The figures given in columns 6, 7 and 8 relate to persons entitled to vote at elections held on or after 2nd October 1963; they are not included in columns 3, 4 and 5.

(2) For constituencies whose boundaries have been altered by Orders in Council made since 8th October 1959, which become effective at the next General Election, the total electorates which will follow redefinition are shown in footnotes.

1 Before 1939 and from 1950 onwards rates are based on home population. From 3rd September 1939 to 31st December 1949 the death rates are based upon civilians only.

2 1940-46 death rates are based upon civilians only.

3 Before 1938 territory of 1937. Before 1948 excluding territory ceded by Hungary in 1947.

4 Excluding infants born alive but dying before registration of birth.

5 1940-45 rates are averaged on years 1940-43. Before 1946 territory of 1937. From 1946 Federal Republic only, including Saar incorporated 1st January 1957. Before 1949 including Elten and Tüddern.

6 Before 1948 excluding Dodecanese. Beginning 1949 rates based on births and deaths which have been adjusted for incomplete geographic coverage. Including armed forces stationed outside the country and excluding alien armed forces stationed within country.

7 Before 1943 territory of 1921-38. 1943-45 present territory but excluding that part of former Free Territory of Trieste incorporated in October 1954.

8 Before 1949 excluding Elten and Tüddern. Including births occurring outside country if one or both parents are included in a Netherlands population register, and deaths of residents outside country if listed in a Netherlands population register. Prior to 1959 excluding data for Amboynese living in camps.

9 From 1940 successive territorial changes affect comparability.

10 1930-34 rates exclude infants dying within 24 hours of birth.

11 Before 1947 excluding territory ceded by Italy in 1947.

12 Before 1950 excluding Yukon and North West Territories, and Newfoundland.

13 Births for 1951-1954 and 1956, final tabulations were based on a 50 per cent sample. Before 1959 excluding Alaska and Hawaii.

14 1945-1950 data are estimates based on population enumerated at 1952 census and death statistics 1945-1952. Beginning 1951, data are births by date of occurrence but include an upward adjustment for under-registration of 8·8 per cent for 1951 and 5 per cent for 1952-1959.

15 Data are for a changing group of states and territories which, in 1961, included a population of about 397 million.

16 From 1945 Japanese nationals in Japan only. From May 1952 including Tokara Archipelago and from 1954 including Amami Islands, both acquired from Ryuku Islands in 1951 and 1953 respectively.

17 Excluding full-blood aborigines.

18 Including Maoris.
